Webinar on

"Role of Automation and It's Impact on Jobs"

Friday, 12thth Febuary 2021 | 2:00 pm – 3:30 pm

[CLICK HERE FOR REGISTRATION](#)

Respected Aasha Ma'am,

Greetings from the ESSCI...!

Electronics Sector Skills Council of India (ESSCI) announces a webinar on **"Role of Automation and It's Impact on Jobs"** to share our learning and experiences and open up discussion with the key stakeholders from the industry, government and academia on 12th Feb, 2021 at 02:00 pm.

Automation is increasingly impacting the world of work from last few years and will continue to do so. This is already felt in some industries, and different countries are experiencing the effects more so than others.

Studies indicate varying degrees of job losses due to automation. But these depend on many factors which have complex interdependencies.

It's not a simple case of the 'jobs we have now' experiencing gains or decreases either. Yes, automation could create more demand for existing goods and services, but it may also lead to new industries and new jobs. Job 'designs' too could evolve once new technologies are embedded, and, if progress is positive, there may even be more work to go around – or not, depending on what action is taken to offset disruption.

The ESSCI, India's Apex body for Skill Development under the Skill India Mission is organizing a Webinar on “**Role of Automation and It's Impact on Jobs**” inviting eminent representatives from Government and Industry on Wednesday, 12th Feb 2021 at 2:00 PM

Key Take Away for the Audience would be:

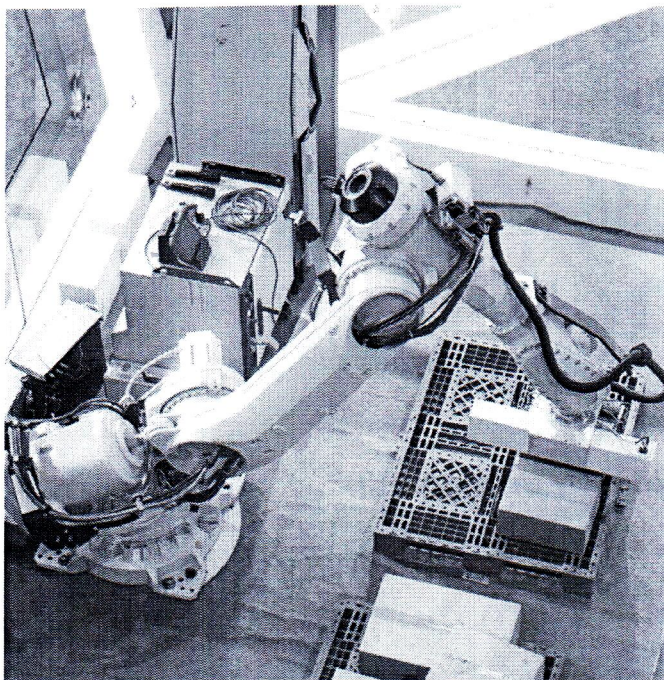

- Familiarization and conversant with the Industrial automation sector.
- How to overcome challenges and advantages for an organization in implementing process automation.
- Net gain in jobs as an impact of advancement in automation technology.
- Key skills to gain employment within the burgeoning automation sector.

For registering for the webinar Click on webinar - <https://forms.gle/2Pm7RvZbZPMZD3pb9>

After registering, you will receive a confirmation email containing information about joining the webinar.

Register now, to assure your participation in this exciting Webinar.

Please be part of this important webinar.
